

Making containers smart

First IoT solution for Intermediate Bulk Containers

www.packwise.io

Chemical industry

Pharmaceutical industry

Food industry

Packwise Smart Cap is cloud connected and provides users with **real-time information on filling levels and geolocations** of containers.

Use cases and benefits

- **automated supply chain management:** real-time data for relevant insights and call-to-action
- **sustainable packaging management:** significant cost and CO₂-footprint reduction
- **smart stock management:** ideal utilization of storage capacity and shorter lead times
- **data-driven business models:** e.g. pay-per-use, consignment stock
- **intelligent logistics:** optimization of transport routes
- **lean production management:** shorter changeover time, just-in-time material flow and traceability
