

PACKWISE COMPANY PROFILE

Dresden (Packwise) - Packwise GmbH is a service provider and Consulting company based in Dresden in the field of intelligent organisation of transport packaging for the chemical, pharmaceutical and cosmetic industries, food industry and for paints and varnishes.

Packwise has made it its business to manage the entire process of packaging organisation in the processing industry economically and ecologically more sensible than today and thus revolutionize the industry. In addition Packwise offers to manage the entire packaging organisation of an industrial companies profitably and in a resource-saving manner. Alternatively, Packwise offers larger companies the know-how to and the technologies around the intelligent packaging organization integrated in the existing supply chain.

Intermediate Bulk Containers (IBC) and drums are globally standardized transport packaging for liquid and pourable materials. This predestines them for digitization. Digital networking enables the step towards intelligent packaging cycles. Intelligent packaging circuits are for the comparison of economic and ecological sense; so also in consideration of customer requirements, open or closed circuits.

In this way and through the mechanisms or the cost pressure of a functioning marketplace the maximum number of recycling cycles, i.e. their value is maintained over a long period kept stable according to their use. They are connected to the reprocessed and reconditioned in the most resource-saving way, and transport routes are significantly shortened. The recycling of the transport packaging and the extraction of secondary raw materials such as steel, plastic and wood are the very last option. The CO2 footprint of the use of industrial packaging becomes so clear on the one hand reduced.

On the other hand, a new and effective profit is generated in the company center was created. The purchasing department does not save on the purchase of a new IBC or barrel, but at the end of use by selling the emptied transport packaging at a fair and market-driven price. Furthermore, digitisation enables a high degree of automation towards efficient workflows in the packaging organization with little administrative effort. Processes, like the production of transport documents is automated. The search for suitable partners for collection is not necessary. Through the resubmission and filter function, all offers can be easily and clearly set and manage.

Packwise is the expert in intelligent packaging circuits for IBCs and drums in the process industry. The company provides a qualified and a specialized network of partners who are ready to provide reuse, reconditioning and recycling, for disposal and logistics always the most suitable and geographically closest solution for the customers.

The Packwise network enables transport packaging with dangerous goods reuse and achieve fair prices for emptied IBCs and drums. Packwise guarantees the reliability and safety of the brokered services within its partner network. Data security, customer and product protection as well as legal conformity are guaranteed.

The marketplace for emptied IBCs and drums www.packwise.de is especially intended for small and medium-sized enterprises that use their transport packaging reliable and safe at a certain time and at a fair market price.

A solution for packaging organization that provides an interface and integration into the customer's existing supply chain, offers great flexibility and companies also have the opportunity to extend their entire process chain of filled and emptied IBCs from purchase to sale and to monitor and control.

The intelligent IBC lid "Smart Cap" provides real-time information on localization and filling levels (track, trace & sense technology as Internet of Things solution). Purchasing processes, warehouse management, internal logistics processes can be integrated into the Packwise solution and create additional efficiency in the company.

About Packwise

Packwise is the independent expert for intelligent packaging circuits from IBCs and drums in the process industry. Packwise networks the market participants. The intelligent packaging organisation automates processes and minimises administrative effort. It is based on platform and wireless IoT technology for real-time information and enables maximum efficiency, Preservation of the value of transport packaging and thus conservation of resources.
